

Dear families:

By this communication, we inform you of the decision taken by the Government of Cantabria to temporarily suspend school activity in all the educational centers in Cantabria.

The temporarily suspend school activity duration is fifteen days, from the 16th March until the 29th, both included. If it were necessary to extend this period, it would be communicated through the official channels.

During this period of temporary suspension of activity in schools, the Educational Administration will try to ensure that students maintain, as far as possible, their school routines. For this reason, the teaching staff will prepare material and activities available to students through digital platforms or any other means of communication that the centers consider most appropriate.

It will be the Head teacher, the CI (Coordinador de Interculturalidad) or the class tutors of your children who will send you the materials and the form of communication with the students and / or families during this period.

We are in an exceptional moment that requires the collaboration of the entire educational community. We thank you, in advance, for your understanding of the difficulties that these measures may cause you.

Sincerely,

Santander, March 12, 2020

THE DIRECTOR OF EDUCATION, VOCATIONAL TRAINING AND TOURISM
